

Welcome to the Grocery Shelf Occupation Based Kit

Establishing a grocery shelf setup in your setting affords many opportunities for the entire treatment team to practice myriad functional tasks and activities. Included within this website are many tasks and activities for you to print out to use with your people to address physical, cognitive, visual perceptual and safety awareness goals while using a universal task. Of course once you obtain a shelf and gather up the individual items, you will generate many more ideas on your own.

What you will need:

[Shelving system](#) with 4 shelves (**adjustable shelving** affords even more possibilities)

Labels for each shelf

Individual grocery items (as many as you want, whatever you want) but enclosed is a [list of common items](#)

Place price tags on items for money management

Play money with sorter for money management

Coupons that match individual items
